

Cybersecurity in the light of COVID-19: Now & next is a half-day digital conference comprising a series of webcasts on current cybersecurity challenges as more begin to work from home, and on emerging cybersecurity challenges due to the COVID-19 pandemic that upended the world.

We will explore security topics around the need for internet security and speed, the human element and the increased usage of smart devices – and delve into what we might all expect post COVID-19 in terms of cybersecurity, as the era of the truly mobile worker dawns upon us.

Join us in one, two, or all three of the panel webcasts in this conference to gain valuable insights into cybersecurity in the light of COVID-19.

CONFERENCE AGENDA

- 1.00-1.45pm Panel webcast 1 | Remote working: Need for speed and security
- 2.00-2.45pm Panel webcast 2 | The human element of cybersecurity
- 3.00-3.45pm Panel webcast 3 | IoT security: Are we ready?

Panel webcast 1 | Remote working: Need for speed and security

People are now working remotely due to COVID-19 health measures, and companies are facing emerging and new security challenges as employees rely on their own WiFi networks and infrastructure.

Come listen and interact with our expert panelists as they discuss challenges with the rise of the remote worker. They will discuss about how IT teams can support this inevitable shift into a different way of working – including appropriate security measures, how to manage remote access controls, the imminent 5G future which poses more attack vectors, and more.

Panelists:

Allan Watanabe, Managing Director at Pipeline Security

Magda Chelly, Managing Director at Responsible Cyber

Quan Heng Lim, Country Manager, Southeast Asia at Privasec

Moderator:

Shamane Tan, Founder of Cyber Risk Meetup and APAC Executive Advisor at Privasec

Panel webcast 2 | The human element of cybersecurity

In this live webcast, we will discuss about the human element of cybersecurity that is relevant during this trying time. We will touch on topics on data privacy and security challenges that arise from increased usage of COVID-19 related apps and related consumer apps, as well as the prevalence of phishing scams around this pandemic.

Join our expert panelists to learn more about how you can protect your data and have enough cybersecurity awareness amid COVID-19 and beyond.

Panelists:

Mohd Noordin, CISO at Circles.Life

Kopal Agarwal, VP of Business Development at Uniken

Shaily Shah, Founder & CEO at Blue Phish

Moderator:

Sharon Ko, Global Black Belt specialist, Advanced Security Analytics at Microsoft

Panel webcast 3 | IoT security: Are we ready?

In this live webcast, we will discuss about IoT security needs and challenges arising from the dramatic usage increase of digital and remote technologies amid COVID-19. We will touch on what happens if these remote technologies are being tampered with, what can be done to mitigate cybersecurity threats in areas such as APIs, and more.

Join our expert panelists to learn more and ask questions around this insightful topic.

Panelists:

Solo Kombani, COO at Aiculus

Sumanta Bose, Founder & CEO at Datakrew

Kunal Sehgal, Cyber Evangelist & Director at a Global Bank

Moderator:

Albert Kuo, President at Asia Pacific Business Consulting
