

FOR IMMEDIATE RELEASE

Asia Pacific's leading 3D printing trade show returns to Singapore this 14 - 15 February 2017

USA's Formlabs, Taiwan's DMP Electronics and Singapore's own Creatz3D Pte Ltd among international exhibitors

Singapore, 9 January 2017 - Rising Media, the global events producer in Internet and technology-related conferences and exhibitions, will host the fourth edition of [Inside 3D Printing](#) - Singapore's only annual 3D printing event and Asia Pacific's leading 3D printing trade show from 14 to 15 February. Held at the Suntec Singapore Convention & Exhibition Centre, the event will give attendees access to expert conferences and demonstrations of the newest technologies in 3D printing.

Breaking new ground in 3D printing locally and abroad

Since 3D printing caught mainstream attention in 2012, the world has seen a flurry of increasingly creative ways to harness the technology. From the [advent of 3D-printed food](#) to luxury retailer Louis Vuitton's [3D-printing of an entire pop-up shop](#), scientists and corporate leaders alike are just beginning to explore the endless opportunities that the technology brings.

In Singapore, homegrown startup Gilmour Space Technologies last year became the first company in the world to [successfully launch a rocket using 3D-printed fuel](#). Researchers from the Nanyang Technological University (NTU) [developed a new ultrasound device](#) that produces sharper images through 3D-printed lenses, while the Singapore University of Design and Technology (SUTD) is [exploring the use of 3D printing to reproduce artefacts](#).

The Singapore Centre for 3D Printing was [launched by NTU on 17 May 2016](#), and is set to receive S\$83 million in funding from industry and government partners over the next 10 years. With the industry enjoying strong support and growth, there is no better time than now to get in on the action at the Inside 3D Printing Conference & Expo.

The Singapore stop of this global trade show series features exhibits by industry leaders from around the world. Local companies Creatz3D Pte Ltd and Eye-2-Eye Communications Pte Ltd will return with exciting new technologies and products, while homegrown Uni-Stat Technology Pte Ltd, a leading provider of solutions for the manufacturing industry in Southeast Asia with nearly three decades of experience, will make its inaugural appearance. Other local exhibitors who have come on board to join this year are 3D Printing Studios, Shonan Design and Image Transforms.

Foreign exhibitors also include the Massachusetts-based Formlab, with their groundbreaking Form 2 3D printer, and Taiwan's DMP Electronics, which brings 3D printing technology into

everyday life. With a great selection of programmes lined up, attendees are guaranteed an eye-opening learning experience and a valuable networking opportunity.

Inside 3D Printing Conference & Expo 2017 show offers **free** entry to all attendees who register online before 14th February 2017, while onsite registration is S\$20. Registrants will enjoy full access to the Inside 3D Printing seminars and the Inside 3D Printing expo hall for the two days.

About Rising Media, Inc.

Rising Media is a global events producer excelling in Internet and technology-related conferences and exhibitions.

Rising Media events provide cutting-edge, practical knowledge for business professionals to improve their day-to-day effectiveness, driving higher returns for their organizations. Attendees learn from leading experts and share knowledge with each other, as well as interacting with innovative vendors in the space. Each event brings together the best, the brightest and the visionary, creating a forum for insight, energetic exchange and informed purchasing.

Operating globally, Rising Media partners with other international media companies and associations to introduce events to new markets, without the risk and expense associated with establishing an operation on the ground. With extensive experience in the complete process of conference and trade show production from market positioning, conceptual input on localizing events in different markets, choosing best location, venue negotiation, sponsor and exhibitor sales, event marketing, recruiting of media partners and trade associations, authoring of conference programs and recruiting of speakers, and all logistical functions including registration and onsite set-up, Rising Media delivers successful events for all stakeholders.
